

☐ PHASE ONE / CURRENT  
■ PHASE TWO

HOME VIDEO  
How do we properly balance video player with access to our other digital platforms and content?  
How do we maintain the robot and the video player as dominant features within the same space?

Archive page for all originals (including those that are off-season, etc.)

Can additionally support "minor" on-air events (marathons, major re-airs, etc.) on this page without having to actually build pages

Should sweepstakes also live under this hub?

Will we ever want more than a little copy and an image for these shows? Ringtones, downloads, etc?

Keeping the schedule allows us to link to specific days/events as needed for promotional purposes (e.g. when we don't build a mini-site for something like a marathon)

Everything under this hub is still totally TBD
